

*Visual Range : Up to 30 miles
Power supply : 120/230 Vac 50/60 Hz
Light Intensity : 400'000 cd
Light Beam : 5° wide, 30° high
Lamps : PAR 64 1000W or 500W*

2 Heads Aeronautical Rotating Beacon

- The aeronautical beacons AL-2000 shall comply with the requirements of ICAO Annex 14 Volum I Paragraph 5.3.3, and to FAA L-801 AC150/5345-12C and French STNA standards.
- Depending on its version, it shall be supplied in 230 Vac or 120 Vac (50/60 Hz).
- It shall be equipped with 2 PAR 64 lamps (1000 W or 500 W). The life duration of the lamp shall be greater than 4000 hours.
- It shall be with coloured filters (Green or Yellow)
- All external metallic parts shall be painted (RAL 1021).
- Its installation is simple due to three fixing flanges.

Main advantages

- Security: The 2 lamps beacon stop immediately when at least one lamp is blown
- Consumption: Electrical Box = 150 W + 2 lamps (of 500 W or 1000 W)
- Colours: Obtained using coloured Filters (Green—Ground aerodromes, Yellow for water aerodromes, Green and Yellow for FAA (L-801H) heliport.
- Flashes frequency: 26 flashes per minute
- Light head elevation angle: Possible adjustment possible from -5° to $+35^{\circ}$
- Finish: All external parts are painted RAL 1021, except lights protections that are in stainless steel
- Fixing: By three holes located on the three fixation flanges
- Option: Heating (Thermostat)
- Option: Filters
- Painted Stainless steel body
